DETAILED ACTION

This Office Action is in response to Amendment B, dated 3/4/03, in Paper No. 9.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 12-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kang et al ('401).

In reference to claim 12, Kang teaches a method comprising:

Providing a transparent substrate (Fig.6A (60));

Fabricating a plurality of gate (88) and source lines (66) over the substrate, each line having a pad (98; 86); (Fig.6A)

Forming a first layer above the substrate to cover at least a portion of the substrate, wherein the first layer exposes the pad of the each line and defines at least one opening near the pad (72); (Fig.6A/6B) and

Forming a second layer (76) having a first part (82) and second part (78/80), wherein the first part is affixed to the pad to provide an electrical signal to the line and the second part is

Art Unit: 2813

affixed to a bottom surface of the opening defined in the first layer to enhance adhesion between the first and second layers (Fig.6A/6B).

In reference to claim 13, Kang teaches wherein the first part of the second layer is a conductive portion and the second part is an insulating portion (Col.5, lines: 55-65).

In reference to claim 14, Kang teaches further including:

Forming a third layer between the second and the first layer, wherein the third layer affixes the first part to the pad and the second part to the substrate through at least one opening defined in the first layer (Fig.6B (74)).

In reference to claim 15, Kang teaches further including:

Forming a third layer disposed between the second and first layer, wherein the third layer affixes the conductive portion to the pad and the insulating portion to the substrate through the at least one opening defined in the first layer (Fig.6B (74)).

In reference to claim 16, Kang teaches wherein the second layer is a TCP (Col.1, lines: 15-25).

In reference to claim 17, Kang teaches wherein the third layer is ACF (Col.5, line:59).

In reference to claim 18, Kang teaches wherein the at least one opening defined in the first layer is fabricated to extend to the substrate (Fig.6B (70)).

In reference to claim 19, Kang teaches wherein the first layer defines a plurality of openings for securing the second layer above the first (Fig.6B (70)).

In reference to claim 20, Kang teaches further including:

Forming a third layer between the second and the first where in the third layer affixes the first part to the pad and the second part to the substrate through at least one opening defined in the first layer (Fig.6B (70))

Response to Arguments

Applicant's arguments with respect to claims 12-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2813

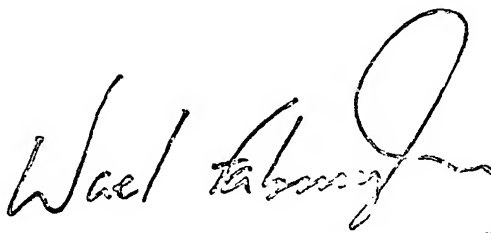

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
